

Full Stack Engineer Technical Exercise - Findings & Fixes

(1.) ~~Issue~~ Status Filter TYPO Fix

- Issue: StatusFilter.jsx file mein "In Progress" option ki value mein typo tha (~~IN~~ Progress (~~TN~~ PROGRESS (TN_PROGRESS likha hua tha instead of IN_PROGRESS)). Iski wajah se jab user "IN PROGRESS" filter choose karta tha, toh backend API request fail ho jaati thi.
- How Found: UI par filter select karke inspect kiya aur dekha ki filter kaam nahi kar raha tha aur status mismatch aa raha tha.
- Fix & Why: Value ko TN_PROGRESS se badal kar IN_PROGRESS kiya taaki frontend value backend Task Status enum se match Kare.

(2.) Task Selection & Details View Navigation

- Issue: Table mein task title par click karne se task details open nahi ho rahi thi. TaskTable.jsx mein click handler missing tha aur App.jsx mein selected task display karne ki state logic nahi thi.
- How Found: UI table mein title link par click karke check kiya, toh koi detail view open nahi ho raha tha.

Fix SWHY:

- (1) Task Table.jsx mein on TaskSelect prop aur title par on click event handler add kiya.
- (2) App.jsx mein selected Task state maintain ki aur selected task ki details (ID, Title, Description, Status, Priority, Assignee) render karne ke liye modal/card add kiya.
